

Design Technology and British Values at Moira Primary School.

Democracy	Rule of Law	Individual Liberty	Mutual Respect	Tolerance
<p>In our DT lessons, we take others' views and opinions into account but still have the right to make our own choices. We take turns both in speech and practically when working with others. We understand that it is not always possible or right to have our own way and understand the value of compromise.</p>	<p>In our DT lessons, we learn to understand the importance of safety rules when using tools to keep ourselves and others safe. We learn to understand and accept that if these rules are not followed that there are consequences to this.</p>	<p>We understand that we are able to listen to others but can also use own ideas and design choices when making a product. We learn to accept that others' ideas may not be the same as our own, but we are able to accept this.</p>	<p>When designing and making we learn to listen to and consider the ideas and opinions of others even if they differ from our own. We learn to take turns during discussions to resolve difficulties or make decisions. We offer supportive comments in evaluations that will improve learning outcomes in a way that is objective but also sensitive to the listener.</p>	<p>In DT lessons, we tolerate ideas from others that are different to our own. We understand that many great design ideas originate from other cultures and religions.</p>
