

## Science and British Values at Moira Primary School.

Democracy	Rule of Law	Individual Liberty	Mutual Respect	Tolerance
<p>At Moira, we learn through our science lessons to take into consideration the views and opinions of others. We take turns and instructions from others.</p>	<p>Using a range of equipment, we learn and understand the importance of following safety rules when working scientifically. Science lessons help children to understand the consequences of their actions, which in turn helps them to apply this understanding to their own lives.</p>	<p>In Science, we learn to confidently share our own opinions and ideas and respect the opinions of others. Within our lessons pupils are encouraged to make their own choices when planning an investigation and recognise that others may have different points of view.</p>	<p>When learning and investigating during science lessons we work as a team, supporting each other and sharing ideas and opinions. We discuss our findings and respect each other's work - through this we offer support and advice to others. We also learn about key scientific figures and the challenges they may have experienced and how science is becoming more diverse and inclusive.</p>	<p>We look at scientific discoveries which have come from other cultures and how religious beliefs often compete with scientific understanding. We learn to be respectful of these beliefs and to appreciate and understand them.</p>
